EDUCATION

M.S. Data Science — University of Texas at Arlington | GPA: 3.67

Arlington, TX | Dec 2026

B.Tech, Computer Science & Engineering — UPTU Lucknow

India | Jul 2022

SKILLS

Product & Fintech: Product Strategy | User Research | PRDs & User Stories | Feature Prioritization | Payments & FX Workflows | Compliance-aware Product Design | Edge Case Identification | Failure Mode Analysis | Cross-border Transaction Flows | Agile/Scrum | Roadmapping | GTM Strategy

Technical: Python | SQL | LLM APIs (Claude, OpenAI) | REST APIs | Data Pipelines | Pandas | Scikit-learn | Power BI | Git | Notion | Jira | Postman | Streamlit | Selenium

EXPERIENCE

Product Strategy Contributor | ConsenTerra · FoundersBoost NYC Spring 2026 *Remote* | Jan – Mar 2026

- Owned product strategy end-to-end for an AI compliance startup — designed pricing tiers, GTM positioning, and onboarding flows for a B2B product operating in a highly regulated space where edge cases and compliance gaps are expensive.
- Conducted competitive analysis across 6 alternatives — identified market positioning gaps and built a value proposition framework that shaped the product's differentiation strategy in a crowded compliance-tech market.
- Translated ambiguous business requirements into clear PRDs and user stories — working directly with the founder and engineering team in a 0-to-1 execution environment with no PM safety net.

Open Source Contributor — AI Governance | Microsoft · agent-governance-toolkit *Remote* | Mar 2026 – Present

- Contributed 7 merged PRs to Microsoft's AI governance platform — built policy validation tooling and security pipelines ensuring AI agent behavior stayed within defined compliance boundaries.
- Applied failure-mode thinking to governance workflows — identified behavioral edge cases in agent outputs before they reached production, directly mirroring the compliance-critical mindset required in cross-border payments.

QA Engineer → Software Engineer Intern | Wingman Partners

India | Oct 2021 – Nov 2024

- Designed and executed structured test plans across 3 enterprise SaaS platforms — identified 200+ failure-mode scenarios including payment flow edge cases, API integration gaps, and data validation failures that would have caused production incidents.
- Built Python + Selenium automation frameworks reducing regression cycle time by 40% — wrote SQL queries across 100K+ records validating data integrity across transaction-equivalent pipelines.
- Collaborated directly with PMs and engineers to translate failure findings into actionable product requirements — reducing production bug rate by 35% through systematic edge case documentation and spec refinement.

PROJECTS

Adaptive AI Study Tutor | Claude API · Reinforcement Learning · SQLite · Streamlit

Live | 2025

- Built and shipped a live AI product end-to-end — designed user flow, built data pipeline, integrated Claude API, deployed to production. Demonstrated 0-to-1 execution in a fast-moving environment with no team support.

GenAI ROI Analysis | Python · NLP · Pandas · 60,907 Records

UTA Symposium Speaker | 2025

- Analyzed 60,907 responses to quantify GenAI adoption ROI across 12 user personas — built data pipeline, surfaced behavioral patterns, and delivered findings at UTA Business Analytics Symposium 2026 as invited speaker.

B2B SaaS Pricing & GTM Strategy | ConsenTerra · FoundersBoost NYC

Product Strategy | 2026

- Designed full pricing architecture and competitive positioning framework for an AI startup — modeled tiers against 6 competitors, identified underserved segments, and produced investor-ready GTM collateral for FoundersBoost NYC pitch.

ACHIEVEMENTS & CERTIFICATIONS

- 2nd Runner-Up — AWS GenAI Hackathon (Texas Universities) | Speaker — UTA Business Analytics Symposium 2026
- IBM AI Product Manager Certificate | Google Project Management Certificate | Google Data Analytics Certificate | ISTQB Certified
